Avertissements

- Les transcriptions britanniques proviennent du Longman Pronunciation Dictionary (Wells (2008)).
- Les transcriptions américaines sont sujettes à caution. Elles sont récupérées directement du [dictionnaire de Carnegie Mellon University](#), mais l'algorithme que j'ai écrit pour la conversion en IPA est loin d'être entièrement fonctionnel. **Vérifiez-les dans votre dictionnaire de prononciation favori.**
- Les erreurs non repérées, tant sur la forme que sur le fond, sont de mon fait uniquement.
- Envoyez vos questions, suggestions, corrections et autres à l'adresse suivante : `adrienmeli at gmail`

4 Week 5

4.1 Conventions

Pour représenter les schémas accentuels, on utilise souvent la représentation suivante :

- un chiffre par syllabe
- “1” si la syllabe porte un accent primaire
- “2” si la syllabe porte un accent secondaire
- “0” si la syllabe ne porte pas d’accent

Exemple :

- photographic
- /2010/
- /,fəʊt.ə.'græf.ɪk/

4.2 Fundamental principles

(after Fournier (2007))

1. Every word has one and only one primary stress (annotated /' or /1/).
2. There can be no sequence of two stresses within a word.
3. No word can begin with two unstressed syllables.
 - When primary stress is placed on a syllable other than the first two, there appears a secondary stress on one of these syllables (annotated /, or /2/).
4. Syllables which receive neither stress /1/ nor stress /2/ are unstressed.
5. The vowels of reduced syllables have a strong tendency to be **reduced** (i.e. /ə/, /ɪ/, /ʊ/, /ɪ/ or /ʊ/).

4.3 Homework

5.5 Evaluations

Nous procéderons à une évaluation de mi-semestre à distance le **16 novembre**.

Munissez-vous de votre pièce d'identité, d'un carnet de brouillon sur lequel vous pouvez écrire gros, ou, idéalement, d'une ardoise blanche avec un feutre adapté (on peut acheter le tout pour €3.50, écrivez-moi si vous voulez le lien que j'ai trouvé).

Nous répéterons la procédure le lundi 9 novembre.

Veuillez enfin noter qu'une caméra sera indispensable pour cette évaluation.
